

FEMA-4

Prefabricated Solar Support Structure

FEMA-1 is a Prefabricated Support Structure designed for rapid shipping and setup. This complete structure enables temporary or permanent installations of ground or rooftop solar arrays.

The FEMA-4 can support four 40" wide solar modules with only two support legs.

- **Free-standing supports**
- **Includes 2 rails, 4 end clamps and 6 mid clamps from K2 Systems**
- **Anchor with ground screws or concrete footings(not included)**
- **Galvanized Metal Frame for Corrosion Resistance**
- **Unassembled to Reduce Size in Shipment**
- **Engineering calculations available(optional)**

Fine Print:

Installation not included.

Purchaser is responsible to confirm requirements of local zoning and building code.

Manufacturer reserves the right to make changes to reflect updates or corrections.

ABOUT SUNNYCAL SOLAR

We have been providing turn-key solar power systems for more than a decade. From our production facility in Central California, we ship direct to customer sites, and have a network of trained installation contractors.
