

# Solar Assurance Program

The Solar Servco provides solar system owners much needed access to solar service professionals. Our services include:

- New System Installation**
- Solar Repairs**
- Battery Additions**
- Removal for Re-roof**
- System Monitoring**
- System Expansion**
- Solar Home Inspections**

The **Solar Assurance Subscription Plan** enables access to full range of services including, performance testing, monitoring, cleaning, and discounts on repairs.

For a nominal startup fee, Servco technicians will assess and document your system components. Following any required repairs, Servco will remotely monitor your system performance. Should your system fail, or suffer a performance decline, we will notify you to schedule a service call.

Residential plans start at:

**\$399 Startup Fee + \$39/month  
\$99 per service call**

Coverage applies to systems <10kWDC, ground mounted or roof mounted on 1-2 story structures. Service call includes 2 hrs labor.

Servco can remotely monitor system performance

### New System Design and Installation

Full range of system types, installed on rooftop, ground mount, or solar carports

### Gen-3 Battery Systems

This new generation system battery system enables the best of all performance features. Grid feedback, battery backup, or off-grid.

### Solar Repairs

We will repair system, regardless of the installation company. If your equipment is still under manufacturers warranty, we will coordinate replacement under warranty. Note, additional labor charges may apply.

### Monitoring\*

Servco remote monitoring give peace of mind to solar owners. If the system fails, we alert owners. Monitoring can utilize existing equipment capability is available. Alternatively, Servco monitoring hardware can be added.

### Battery Additions

Owners can add batteries to existing solar system to create emergency power or off-grid capability.

### Equipment Removal for Roof Replacement\*

Solar equipment can be removed for roof replacement, and reinstalled after completion. Full functional testing is performed to ensure energy production is restored. (Pricing based on system size)
